Welcome to Inland Empire Pyladies & Women Coders!

Agenda

6-6:30pm Introduction

Background: What is IE Pyladies/IE Python? What is Learn to Code with Us?
Thank you to our sponsor Riverside.io
Intros: your name, a bit about your programming experience if any.

6:30-9pm Learn to Code with Us in Riverside!

Everyone chooses a coding tutorial to work through independently.
For ideas and inspiration, see:
* http://www.meetup.com/iepyladies/events/193373112/
* http://www.learntocodewithus.com/resources/

Ask for help if you can't decide which tutorial to try, or if you get stuck on setup or general confusion.

Local Resources

The organizers of the following meetups are here tonight. Whatever your interest, there's a resource for you to learn more and share your knowledge. If you have questions about any of these, ask!

* IE Pyladies & Women Coders: http://www.meetup.com/iepyladies/ (Audrey, John)

* IE Python: http://www.meetup.com/iepython/ (John, Audrey)

* StartupIE: http://www.meetup.com/startupie/ (Mike)

* Riverside.io: http://riverside.io/ (Mike)

* Riverside Raspberry Pi Users Group: http://www.meetup.com/Riverside-Raspberry/ (John)

* San Diego Pyladies: http://www.meetup.com/sd-pyladies/ (Carol)

* Girl DevelopIT San Diego: website coming soon (April)

There are more on meetup.com. We are all really just one big tech community. Some of us even organize more than one meetup :)

Shy about attending a meetup that is mostly men, or a meetup about an advanced coding topic? It can be intimidating. You are not alone; talk to Audrey about this if you want. If it helps, be reassured that the organizers of the above are working to make their meetups welcoming and approachable to you (and they care so much about being friendly/open that they're here tonight).
